A GOOD PERFORMANCE

By the Schulenburg Minstrels.

A company of amateurs from our neighboring city of Schulenburg appeared at the opera house in Shiner last Thursday night in a select program of singing and humorous plays and gave good satisfaction. A number of songs, duets and quartettes were rendered and also some instrumental pieces.

Mr. Raymond Winfree, the editor of the Schulenburg Sticker, was the interlocutor and was there with the goods. The two Cornelson boys were the end men and did well. Miss Emmie Cornelson, in her songs and instrumental pieces, was easily the star of the evening. Her violin duet with Mr. Kessler, was the best number on the program and won the most liberal applause. The songs by little Miss Catherine Cornelson, exhibited much talent, and this little Miss will some day make her mark as a violinist.

Schulenburg is to be congratulated on possessing so much musical talent, and we hope they will duly appreciate it.

The performance taken as a whole, could hardly be excelled by amateurs anywhere. The troupe was fortunate in having that jovial, wholesome Frank Johnson along as business manager. Without Frank, the performance might not have been the success that it was financially. We hope the Schulenburg Minstrels will come again with a change of program, when they can be assured of a full house.

For Many Years
UNITED STATES
CREAM SEPARATORS

have been tested under all conditions, and have proved to thousands of satisfied users that they are the very best separators in the world. There are good reasons for their great superiority as the 1909 Model.

United States Cream Separator
Has Greatly Reduced Diameter of Bowl

and still retains its great milk capacity. The currents of the milk in the separator bowl are so increased that the U. S. is unequalled by any other separator for efficient skimming, hence the U. S. separator won and holds the **World's Record**.

All parts of the machine are strong, simple and easy to get at. The gears being entirely enclosed are protected from dirt and dust. The whole machine is very light running and friction is reduced to a minimum because the working parts run in oil, and are accurately made and fitted. No other separator has all these advantages. **The Improved U. S. is the cream separator for you to buy. See one for yourself.**
